Subject: Q3 2022 UPV Nigeria Geosolutions Line Manager Award
Attachments: Q3 Line Manager Award - Maximizing Debris Survey Performance to Deliver New Oil.pdf

All,

Congratulates for being joint recipients of the Q3 2022 Line Manager Award under the **Maximise our Performance** category for the **Maximizing Debris Survey Performance to Deliver New Oil**:

- *Mobilized MV Joetek Nurse to execute surveys with Zero LTI, achieving over 500 Goal Zero hours.*
- *Reducing CO2 emissions (0.11ktCO2e to Zero (0) emission) by eliminating a separate debris survey campaign by synergizing with the ongoing as-built survey*
- *Maximized our performance by eliminating additional mob/demob cost of \$100k if separate debris survey executed*
- *Estimated cost saving of \$200k by leveraging existing survey activity*
- *SEWOP Whisky Star XIX Safely positioned at Cluster JB for the commencement of the Well Lift Activities with no incident to deliver 6.67kbbls/day.*

This is an important activity and we appreciate the proactive resource optimization.

Please find attached the signed certificate.

Kind regards,

Jake Emakpor (on behalf of the Geosolutions LT)
