Subject: EA Integrator of the week - Details

Dear Bode,

Please see our integrator of the week details below :

Nominees: Nelson Iloakasia, Amos Etuele, Godspower Ebilade and Dexter Ojukonsin

Activity: RPA Crane has been down due to leaking Luffing Rams, putting critical activities such as the 6M routine pigging and 5yearly intelligent pigging on 16" Tunu-RPA GL, backloading of defective RPA Generators onshore for overhaul etc, on hold.

Nelson Iloakasia and Amos Etuele drove the exercise with Godspower and Dexter (our in-house Crane Technicians) replacing the defective RPA Luffing Ram without external support.

Their actions have restored lifting activities to RPA and saved vendor/OEM mobilization and maintenance costs of circa \$9,689.48 USD.

They were supported by our Scaffolders (Stephen Aye, Monday Joseph and Amos Ezetu) and Rigger (Chuks Owunze).

This is an effort we believe to be worth celebrating.

We thank you for your time and understanding.

My warm regards,

Rume
