Subject: RE: FURTHER BOGT AGO COST OPTIMIZATION COST INITIATIVE ON FFPSVs

Hello Diki,
Following our extensive conversation, January to March 2021 savings is supported.
Warm regards,
Ope

Ope,
Following our discussion this morning, please find below savings from the initiative I-0154314 Optimize security vessel AGO consumption & reduce vol. by 450k Ltrs by Dec 2021.
Attached is the fcf value from table below using 379.5 exchange rate.

As agreed , we are only banking the savings realized January till March 2021 before deployment of the vessels in April 1st 2021.
Please review the submission (attached) against figures in table below and FIT4 values(Actual -125,928.85 and FCF 32,867.43) for correctness and support to enable us submit for approval.

Kind Regards,
Diki.

General
Please do the Maths for me now?
Just on a spreadsheet for easy reporting.

Kind Regards,
Diki.

My Sis,

Add up till end March 2021 that is the savings so far.

Rgds
Emenike

Diki,

Please see below further cost saving from BOGT folks.

General, team,

Well done for the sustained push to challenge our processes with visible results.

Rgds,
Chris

Subject: RE: FURTHER BOGT AGO COST OPTIMIZATION COST INITIATIVE ON FFPSVs

Bro Chris,

Sequel to further AGO Cost optimization the weekly AGO supply to the deployed BOGT Security OMS Fit For Purpose Security Vessels(FFPSVs) providing offshore escort and static security services have been optimized in line with Business Continuity and Cost Preservation. The newly deployed FFPSVs AGO consumption pattern providing security services in BOGT offshore field have been studied and monitored constantly; The permanent vessels AGO consumption pattern and movement from BOGT Slot Jetty to and from CLP/SBMS 1, & 3 and 48" Export Pipeline Patrols etc respectively were observed for a month hence the submission that the two FFPSVs can run with 7,000liters of AGO weekly as against 10,000litres of AGO normally issued to them weekly. Having monitored their AGO consumption from 2nd. June 2020 hence the urgent need to optimize in July 2020 the new AGO supply to them going forward

On a Happy Note ,We are glad to report that this cost saving initiative have saved SPDC Corporate Security 6,000litres of AGO cost weekly for the two FFPSVs of OMS Vessels; For one month saved is 24,000litres and one year saved is 288,000 litres . Going by current SAP Cost **of AGO at N295 per litre x 288,000 Litres of AGO saved for one year is N85million consequential cost savings.**

Sustained monitoring is ongoing without compromising offshore security cover and follow-up as the need arises.

Regards,
Emenike .
