FUEL EFFICIENCY Reduce Fuel Consumption Monthly report

Fuel Consumption

1 323,4 m³

Fuel Saved*

113,5 m³

Fuel Potential Savings **

191,0 m³

REPORT DESCRIPTION

This report aims to highlight inefficiency in the SNEPCO fleet fuel consumption for last week and provides possible action that should be taken in order to improve the overall fuel efficiency.

This report consists of two sections, 'Fuel consumption follow-up' and 'Reduce fuel consumption'. The first section offers a view on consumption of the fleet. You can also check if the consumption is in line with what Opsealog model is expecting. Reasons for discrepancies can be crew reporting mistakes, vessel performances better/worst than their sisterships. Some external parameters are not considered by the Opsealog algorithm.

The second section aims to highlight fuel potential savings, fuel already saved and more generally how to improve the fuel efficiency of your fleet. Opsealog analysts can give you more explanations if needed.

OBSERVATION

Recommendations have been done during weekly reports

NOTE

* Fuel saved compared to the screening period practices. ** Fuel potential saving is fuel that could have been saved if the best practices were applied.
